But don't forget
These 4 tokens represent what make up a human
If you leave while lacking even one of them
You will be an incomplete human

© 日渡计划 All Rights Reserved

That damned old hag...
I was just venting off because I realized my worthlessness...
Why would you... ugh...
Perhaps they were just lost...
Or perhaps they didn't have any choice...
Although I don't know what happened to everyone before,
Perhaps they had made an irreversible mistake like Number 6...
Or perhaps they were cornered in their life
Even so, not all people who have made mistakes are unforgivable.

So that they can leave this place safely.
Either way I want to stay here and help everyone
You haven't changed at all
If the gun isn't filled up, I don't dare to
UM...
The next one will be me.
What do we do next?

Miss Centaur
I am withdrawing from the game
Aru?
You aren't playing anymore? The extra token is worth 10 Million each you know
I have already obtained 4 tokens,
And there's no way to continue the game with this situation.
No thanks.
No-where 4...

You are running away after earning enough tokens?
!?
How selfish Number 4
How about you let me shoot you once to seal your escape?
Eh?
You... What are you doing?!
Did I do anything wrong?!
Calm down Number 7!!
If you waste any more token, there will be no turning back!!

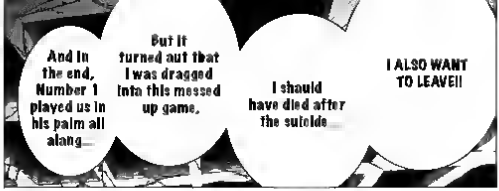
U17.com 有缘一网创精彩



I ALSO WANT TO LEAVE!!
I should have died after the suicide...
But it turned out that I was dragged into this messed up game.
And in the end, Number 1 played us in his palm all along...

As long as I haven't earned enough tokens, don't you guys wish to leave!!
Damn you!! You are the selfish one here!!
I WILL SHOOT ANYONE THAT WALKS AWAY!

© 日版計劃 All Rights Reserved

What the hell is with you guys?
After Number 6 made a fool out of him self, now Number 7 has gone crazy too?!
Is there really no solution?
Isn't there like a token inside the gem?
Not even one round has passed and every thing is messed up, how do we continue now?
It's all Number One's fault
To think he was a veteran player...
WHAT DO WE DO...
WHAT SHOULD BE DONE ...
NUMBER 3 REALIZED THE BLIND SPOTS IN THE RULE
IF WE MAKE THE BLIND SPOTS OF OUR STARTING POINT OF THE PLAN.
THEN, PERHAPS ...

Ah?
Is the gun out of token?
But why..
SLUMP
Looks like after getting Miss Centaur's permission to leave the game,
it is effective that Number 4 withdrew from the game therefore you were unable to target him
Is there really no way..?
Number 7 have you really gone nuts?!
What a relief..
Everyone
Listen to me..

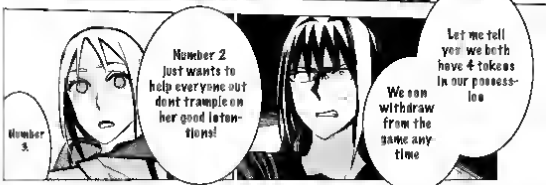
The plan made by Number 1
We still can use it.
But firstly we have to assess our current situation
After that
Hehehe I thought you were about to suggest some brilliant idea.
ARE YOU GUYS ACCOMPLICES?
Because you didn't earn more than Number 1, you want to use the same plan to squeeze our tokens out?!
!?
You think I will believe you so easily ?!
Don't you dare take any chances on me!!
I..
© 日更计划 All Rights Reserved



Number 9
Number 2 just wants to help everyone out dont trample on her good intentions!
We can withdraw from the game any time
Let me tell you we both have 4 tokens in our possession

I am sure you are the same as everyone...
Even if you want to shoot, you can only shoot once...
Nobody wants to die here no?
Then what? Have you ever thought a step ahead?

U17.com 有故事的原创漫画

These is all my tokens
4 tokens
Next, I want everyone to take out your tokens too and play the game
This way we can prevent anyone from cheating
Miss Centaur didn't restrict any action outside of the rule
Miss Centaur
You didn't state that you could cheat other people, did you?
In other words...
But I didn't say you couldn't too.
Do you remember when Number 6 aimed at Number 1?
What can you do any way?
If one doesn't put the token in gun.

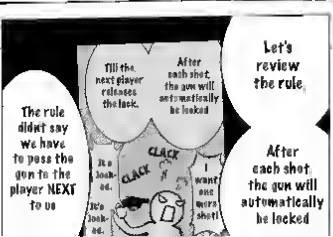
U17.com 青少年原创频道



Let's review the rule.
After each shot the gun will automatically be locked
Till the next player releases the lock.
After each shot the gun will automatically be locked
The rule didnt say we have to pass the gun to the player NEXT to us
CLACK
CLACK
It's locked.
It's locked.
I want one more shot!

As everyone knows
[Russian Roulette]
This is a game of probability
And our goal is to shoot ourselves and gain the prize.
But if the chamber isn't fully loaded we are taking chances here
That's why Number 1 suggested the fail-proof plan to beat the game.
First, there are 3 bullets loaded
x3
x6!
The first player will insert 3 tokens + fill the chamber here.
By that, the hit rate will raise to 100%.
100%
After that, each person only need to load 1 token to earn more tokens.
But something went wrong at Number 5's turn.
Player Number 5 you have 0 token.
Please leave the game
It's all because Number 1 didn't fill in 3 tokens as planned
© 日昇 All Rights Reserved

Number 5 wasn't that lucky, she got a [Miss] despite inserting a token.
That's why she lost the game.
Tokens | Insert | Shoot | Result
x3 | +0 | −1 | =2
After Number 1's turn, only 2 tokens are left in the chamber.
1, Number 3 and Number 4 all put in 1 token inside the chamber.
We were fortunate to earn 2 tokens and have 4 tokens in our possession.
Tokens | Insert | Shoot | Result
x2 | +1 | −1 | =2
Reduce | Gain
x3 | −1 | +2 | =4

Number One Li Jing Hao
And the reason why he had so many tokens.
He played this game before
It's all because this isn't his first time in this kind of game

But I really...
It's all right even if someone hides some
RUSTLE RUSTLE
THAT'S WHY IT IS POSSIBLE THAT YOU ARE STILL HIDING SOME TOKENS!
I DON'T BELIEVE THAT YOU EARNED THOSE JUST BY BEING LUCKY !

© 日更计划 All Rights Reserved

We will be fine as long as we monitor their control when inserting tokens to the gun
Here is my 3 tokens
I agree.
Yeah, I also agree
Here is my 3 tokens too
Here I have 4 tokens
How about you Number 7?
Fine.
You'd better don't play any trick Number 2!
These 3 tokens are all I have

Thank you for believing me, everyone...
You said that we can still use Number 1's plan.
How?
Number 1's plan was to fill up the guns chamber
Then we will have 100% success hit rate.
Since there's only one token in the gun,
Number 7's token can't possibly fill it up with her 3 tokens
I have 4 tokens here
So I think...
NO.

© 日更计划 All Rights Reserved

You think you want to use your tokens to fill it up?
Because there's no rule that we have to shoot in order.
Even if you insert all 4 in it, you'll still only have 5/6 chance of [Hit]
If the chamber isn't filled up, theres a possibility of it resulting into a [Miss]
I don't think you should take up the risk
But I think it's a good idea
5/6 is a big chance
I DIDN'T ASK FOR YOUR OPINION.
Ah... Ha ha ha
That's not it.
I am well aware that I can't fill the chamber by myself...
But...
